

SOUTHEASTERN CONSTRUCTION

STRUCTURAL STEEL FABRICATION & INDUSTRIAL SITE CONSTRUCTION

FIELD OPERATIONS

**QUALITY AND SERVICE ARE OUR STRENGTHS
YOUR SUCCESS IS OUR ULTIMATE GOAL**

ABOUT US

Since 1972, Southeastern Construction's Field Operations Team have completed complex projects throughout the southeastern United States. Our team implements the latest technologies and techniques when constructing our customers' projects.

The Field Operations Team possess valuable skills to make your vision come to life. Our experienced craftsmen monitor project deadlines, enforce safety protocols, communicate goals and expectations, and stay on budget.

Licensed in Alabama, Florida, Georgia, and South Carolina; our diverse construction capabilities and experience have repeatedly proven Southeastern Construction a valuable construction partner.

SKILLS & QUALIFICATIONS

Southeastern's Field Operations Team provides excellent field services in the industrial markets including power generation, chemical, oil and gas, pulp and paper, mining and minerals, and agriculture.

- Certified General Contractor
- National Board Accredited - R Stamp for Repairs, Alterations, and Rerating of Pressure Retaining Items
- Underground Utility and Excavation Contractor
- Fireline V Contractor

FIELD OPERATION SERVICES

Southeastern provides high-quality, competent on-site construction and maintenance services.

Site Development

Prepares any construction site for development by site grading, excavation, and examining underground utilities.

Structural Concrete

Uses reinforced concrete for your projects. The tensile strength of steel and compressive strength of concrete work together to sustain your foundations, slabs, and piers for considerable timespan.

Structural Steel Erection

Assembles steel components on site, and then secures the components by bolting and welding them into place for your process buildings, pipe tacks, and more.

Equipment Setting

Precision installation and alignment to achieve a long-life cycle for the equipment.

Process Piping

The most precise part of any project, we have the experience and skill to install this critical component.

- B31.1 Power Piping
- B31.3 Process Piping
- B31.8 Gas Piping
- B31.12 Hydrogen Piping
- API 1104 Pipeline

In-Plant Maintenance

With decades of experience and skilled craftsmanship, Southeastern provides preventative maintenance and ongoing repairs.
