ABOUT US

At Southeastern Construction, we enjoy bringing captivating theme park ideas to life! Our diverse construction capabilities allow us to design, develop, and construct theme parks for people to enjoy for decades to come.

Founded in 1972, Southeastern Construction provides structural steel fabrication, industrial site construction, and theme park construction.

Our theme park construction services use the latest BIM, CNC Fabrication, and project management technologies.

Our highly skilled, safety-conscious, and experienced craftsmen exceed expectations, meeting on-site needs while keeping the project on schedule and within budget.
